

FOSUN AND CLUB MED DONATE 80,000 MASKS TO THE AUVERGNE-RHÔNE ALPES REGIONAL HEALTH AGENCY

Highly committed in France, through Club Med but also Lanvin, Peref, Saint-Hubert, Tridem Pharma, and concerned about the strong development of the Covid-19 pandemic in our country, the Fosun International Group wishes to support and contribute to the actions currently led by the French health and public authorities.

At the request of the Founding President of Fosun International, Mr Guo Guanchang, and under the direction of Henri Giscard d'Estaing, Global Partner of Fosun and President of Club Med, the Group's teams have taken action in China and France to donate 80,000 respiratory protection masks and 5,500 scrubs to French health authorities.

Giving the strong presence of Club Med in the Auvergne-Rhône Alpes region and the existing stock of masks in its alpine resorts, Club Med teams have contacted the Auvergne-Rhône Alpes health agency to offer the rapid transfer of its equipment.

After swift approval, our teams have immediately implemented the process in close collaboration and active support of the Region, at the instigation of its President, Laurent Wauquiez, enabling the delivery of the material to the health professionals in the area (hospital staff and local doctors).

With this donation, the Fosun Group and its French subsidiaries want to show their solidarity and contribute, with their means, to the fight currently waged to curb this pandemic.
